Introduction

The LiteCommerce **X-Cart Import** add-on module allows to import the database from X-Cart Gold store, including products, categories and users.

1. Administrator Zone

This section contains information on:

- [installing the LiteCommerce X-Cart Import add-on module;](#)
- [operating the module.](#)

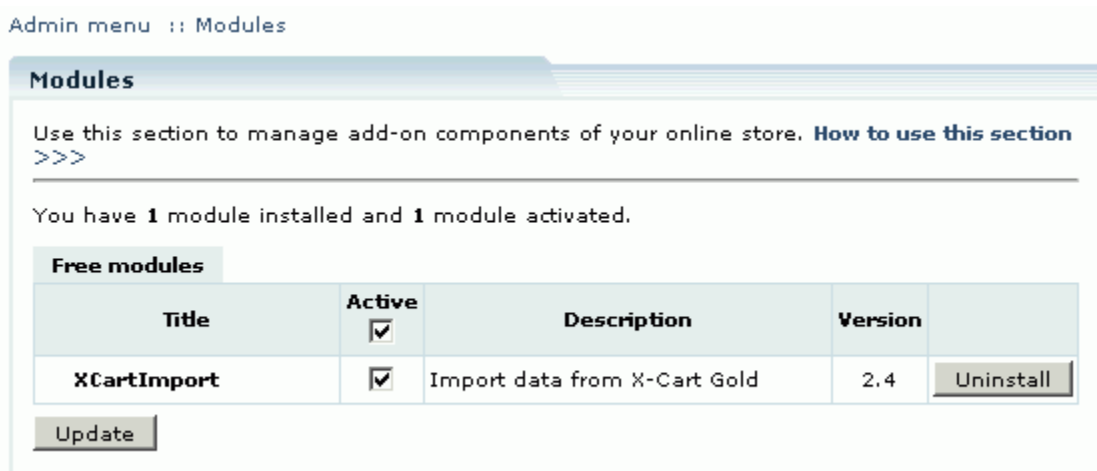

1.1 Installing the Module

To successfully install **X-Cart Import** add-on module your shopping system requires LiteCommerce shopping cart software version 2.x to be installed at your online store.

Select the 'Modules' section in the 'Settings' menu of the Administrator Zone. The list of currently installed modules will appear. To install a module (**X-Cart Import** in our case) click on the '**Browse...**' button, select the module's '**.tar**' file and click on the '**Install**' button to add the module to your store setup.

'**X-Cart Import**' module will appear in the list of the installed modules; it will be activated automatically.

To deactivate the module, unselect the '**Active**' check box against the module title and click on the '**Update**' button. To completely uninstall the module, click on the '**Uninstall**' button.

1.2 Operating the Module

Go to 'Import database from X-Cart Gold' section of the 'Maintenance' menu.

Admin menu :: X-Cart Import

Import X-Cart data

X-Cart database connection parameters:

Host:

Database:

Login:

Password:

If you do not have any available database connection, you can backup your X-Cart database using X-Cart admin interface and restore the backup file using the "DB Backup/Restore" menu. After that, use this dialog to import data from the local database.

X-Cart database version:

Version 3.X:

Version 4.X:

Import options:

Import products and categories:

Import users:

The following groups of options are available:

X-Cart database connection parameters: host, database, login and password. If you do not have any available database connection, you can backup your X-Cart database using X-Cart admin interface and restore the backup file using the "DB Backup/Restore" menu. After that, use this dialog to import data from the local database.

X-Cart database version: select 'Version 3.x' or 'Version 4.x' depending on which you have installed.

Import options: select corresponding check boxes if you want to import products and categories as well as users.

Specify the necessary options and click '**Import**'. The data you have selected will be imported into your LiteCommerce store.

The following issues can arise during the import and corresponding warnings will be displayed.

1. Login is incorrect.

Can't connect to **localhost** using user name **xcart_user**

2. Access to the database denied.

Can't connect to **xcart_database** database
(Access denied for user: 'user@localhost' to database 'xcart_database')

To remove all the X-Cart related information from your database after the import select the check box 'I want to remove X-Cart tables' and click '**Remove**'.

2. Customer Zone

The LiteCommerce **X-Cart Import** add-on module does not affect the look of Customer Zone.

Terms and Definitions

Administrator: a 'super-user' of the online store system who is privileged to configure the entire store and manage products, customers and orders;

Administrator zone: an administrator back office where the store Admin can configure, control and monitor store operations, enable or configure various features of the store;

Customer: a registered store user;

Customer zone: an area at the online store where store customers can manage their profiles and review their orders;

User: anyone who visits the online store.
